

# PRIORITIES FOR APEC Finance Ministers' Process 2022

## “Advancing Digitalization Achieving Sustainability”

### Sustainable Finance

Recognizing the region's vulnerability to climate change & the pressing need to move towards a more sustainable economy.

Thailand places sustainable finance as a front agenda & promotes environmental, social, and governance-related causes in the financial market, building back a greener & more sustainable economy that is not only resilient but also able to enhance the quality of life for all.

### Digitalization for Digital Economy

COVID-19 has expedited the adoption of digital means to trade, communicate, work, or even conduct economic policies

Digitalization, including the development of financial technology, has been key to the region's recovery from COVID-19 & will be the tool to support financial inclusion & engage small businesses, thereby providing economic opportunities to all.
